

PADALA SHANMUKA REDDY

Full Stack Developer

+91 6281315915 | shanmukareddypadala@gmail.com | LinkedIn | GitHub

Professional Summary

Result-oriented Computer Science undergraduate (CGPA 8.40) with strong expertise in backend development, distributed systems, and scalable SaaS architectures. Proficient in building robust APIs and microservices using **Node.js**, **PostgreSQL**, and event-driven systems. Demonstrated strong problem-solving skills with over **1000+ challenges solved** on CodeChef. Seeking a challenging software engineering internship to leverage expertise in system design, cloud integrations, and high-performance backend applications.

Education

Aditya College of Engineering and Technology Surampalem, India
Bachelor of Technology in Computer Science and Engineering 2023 – 2027
CGPA: 8.40 / 10.0
Key Coursework: Data Structures & Algorithms, OOPs, DBMS.

Technical Skills

- Languages:** Java, JavaScript, Python, SQL, Dart, C.
- Backend & Frameworks:** Node.js, Express.js, RESTful APIs, Microservices Architecture, CQRS.
- Cloud & Messaging:** Google Cloud Platform (Pub/Sub), Apache Kafka, Debezium, Firebase.
- Databases:** PostgreSQL, MongoDB, MySQL.
- Developer Tools:** Git/GitHub, Docker, VS Code, Postman.

Key Projects

Multi-Tenant SaaS Backend Platform | *Node.js, PostgreSQL, REST APIs* [GitHub Link]

- Engineered a scalable multi-tenant architecture ensuring strict data isolation and secure access across distinct organizational units.
- Implemented robust Role-Based Access Control (RBAC) and secure authentication mechanisms using JWT.
- Optimized database schemas and API endpoints to handle high concurrent request volumes with minimal latency.

Payment Gateway Integration Service | *Node.js, GCP Pub/Sub, Webhooks* [GitHub Link]

- Developed a secure payment processing microservice featuring webhook integrations for real-time transaction status updates.
- Architected an asynchronous event-driven notification service using **Google Cloud Pub/Sub** and Cloud Functions to guarantee reliable payment confirmations.
- Designed fault-tolerant mechanisms to handle network failures and ensure transactional integrity across the system.

Programming Achievements

- CodeChef:** 1-Star Coder | Solved **1000+ problems**, ranking in the top tier of competitive programmers. [Profile]
- LeetCode:** Solved **150+ problems** with a focus on graph algorithms and dynamic programming. [Profile]
- HackerRank:** Earned **4-Star Badges** in Java, SQL. [Profile]

Certifications

- Programming in Java** – NPTEL (Elite Certification, Score: 68%) [Certificate]
- Full Stack Development using Flutter** – Technical Hub [Certificate]
- MongoDB Associate Developer** – MongoDB [Certificate]
- API Fundamentals** – Postman Student Expert [Certificate]
- GITHUB** – Github Foundations [Certificate]
